School #2
January 19 - 21, 2010

Three-day session with welcome reception the evening of January 18.

School #3
January 26 - 28 (29), 2010

Three-day session with optional fourth day (January 29) available for training in multiple burners or control panel instruction upon demand.

Welcome reception the evening of January 25.

Hauck Manufacturing Technical Seminars

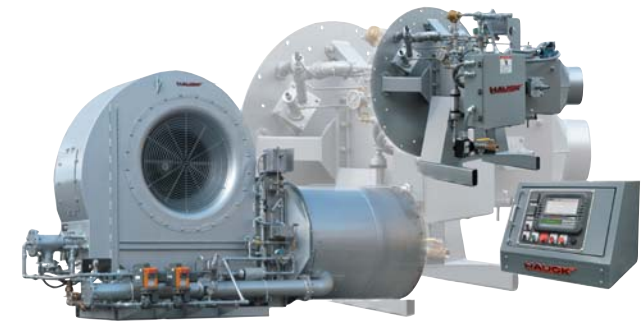

Hauck Manufacturing Company conducts customer training classes throughout the year at its Customer Technical Center located adjacent to the main plant on Hauck's 15 acre campus. Additionally, Hauck offers private company seminars at customer locations both domestically and abroad. Topics span the range of simple product maintenance sessions to advanced sessions on combustion theory and system design utilizing Hauck's e-Solutions for Combustion® engineering software.

Contact Hauck or your local representative for additional information about seminar schedules or to request a proposal for a custom tailored private seminar for your company. The latest seminar information is posted on Hauck's corporate website at

www.hauckburner.com
